Jaguar Funds' positive returns defy market trends

Jaguar Funds' Australian Leaders Long Short Fund has followed up its strong 5.04 per cent positive January result with another positive return for the month of February. The Fund is up 3.55 per cent, in marked contrast to most managed fund categories which produced negative returns for the same period.

Managing Director and CEO of BBY, Glenn Rosewall said that the Australian Leaders Long Short Fund was continuing its positive run and capitalising on its exposure to Australian resources companies. "The fund is taking advantage of volatile markets and its long/short exposures are appropriately positioned," he said.

As at February 29, 2008, the Fund is up 14.51 per cent for the last six months and up 22.2 per cent over the last twelve months.

"The bear market phase is allowing the fund to show that it really does perform in both rising and falling markets. The fund is not only protecting investors' capital but is also outperforming key indices and providing competitive returns," said Mr Rosewall.
